### Hold Progressive

#### Five Hundred Drive

As will be seen by advt. elsewhere in this issue, the local Chapter of the Daughters of the Empire, are holding a Progressive Five Hundred Drive, on Wednesday next, March 11. The invitation is a public one. A price of 50c. will be charged for admission, which will include supper to be served by the ladies. Two prizes will be given, one lady's and one gentleman's, to the most successful contestants.

Mrs. W. Pullin, left today, on a trip to Calgary.

Gerry Johnston, underwent a minor operation at the local hospital this week.

Mildred Henderson, submitted to a minor operation at the local hospital, on Tuesday.

Mr and Mrs. O. Carter, who have had charge of the store of Mr and Mrs. J. I. Stoudt, during the winter, left for their farmstead north of Jenner, this morning.

Copy for chance of advt. brought into this office after noon on Mondays of each week will POSITIVELY not be taken notice of until the following week, unless other arrangements happen to be made with the publishers.

### United Church

#### SUNDAY SERVICES

2.30 p.m. Regular Sunday School session. Judge Humphrey, N.Y., says: "Our crime is almost wholly committed by those whom the Sunday School does not reach. Of thousands of cases before me during the past sixteen years, there has been only one who was actively associated with the Sunday School."

7.30 p.m. Public worship. Subject, "What shall I do on Sunday?"

Bright song service. Music by the choir. You need these services, they need you. Come!

#### New Well-Cared For

The ladies of the I. O. O. E. wish to announce that they have received all necessary money for the MacFarlane family, and the family are well-cared for in the matter of clothes and shoes. A further \$10 was received, recently and applied to this cause. The ladies wish to thank all donors for their generous help.

A pessimist is a man who when faced with two evils chooses both.

### Father and Son Banquet

Under the auspices of the Empress Boy Scouts Association, a "Father and son" banquet will be held in the Scout club room on Friday evening, April 16, at 7 p.m. sharp. It is expected that each scout will be accompanied by his father and seated with him at the banquet. The mothers have already made plans for the catering and no one knows better than they the capacity of both father and son, thus a generous dinner is assured. An interesting after dinner programme of speeches, music, readings, a sing-song of popular and old time songs for everybody and also a demonstration of scout work. The aim of the gathering is to foster a closer relationship and better understanding between father and son. The boys of to-day will be the men of tomorrow. The importance of their training cannot be too highly emphasized. A responsible part of this training falls to the father. "The costliest thing in the world is to be a real father to one's boy. It costs energy, money, time, patience, convenience and comfort. But it is all infinitesimal in cost as compared to that greater price one pays when he realizes too

late that he has failed to make a real investment in his son's life." The mothers are interested and anxious to make the banquet a success. The boys will be there "with bells on. Dad's it's up to you. Don't funk."

A meeting of the Empress tennis Club will be held in R. M. Henderson's office on Monday evening at 8 p.m. All those interested are invited.

Pull down the High Cost of Living. Brodie's advert' will show you how.

### To Arrange Sports Days

A meeting of representatives of towns on the line between here and Swift Current, is to be held at Cabri, Tuesday next, April 13, to fix dates for the holding of the annual celebrations for the various towns along the line, so that the dates would not conflict.

A farce entitled, "Engaged," is being put on by local talent at Jenner, some time during the coming month.

## Sunflowers Multiply Farm Profits In Western Canada

Silos and sunflowers promise to revolutionize farming methods in Western Canada. This promise is revealed in the results of various tests that have been made in various parts of the prairie provinces for several months past.

That also on the farm practically double the stock carrying capacity of the land is a fact well proved by the experience of thousands of farmers in all parts of the North American continent, while practical experiments in the growing of sunflowers, made on farms and experimental stations in various parts of Western Canada show that twice as large a yield per acre can be obtained with sunflowers with corn or any other silage crop. So very satisfactory were the results obtained last season in widely scattered parts of Alberta, Saskatchewan and Manitoba, both in growing sunflowers and using them for ensilage, that it is safe to say that a considerable area will be planted to this crop in 1920.

Perhaps the best crop of sunflowers in Western Canada has been raised on the Demonstration Farm of the Canadian Pacific Railway at Strathmore, Alberta. From some eight acres of land an average yield of 36.6 tons to the acre was obtained. The land on which it was grown was irrigated. It might be said that irrigation the season was a most profitable one. Perhaps, for this reason, the yield was heavier than would be expected, but, generally speaking, twenty-five to thirty tons of sunflowers to the acre can safely be looked for on irrigated land in Southern Alberta.

Sunflowers were also grown with great success on land in districts where irrigation is not necessary. At Olds, a yield of thirty tons to the acre was obtained by one farmer. At Carleton Place, tons to the acre were gathered, and at Dayland, Thomas Noble harvested fifteen tons to the acre. All these places are in central Alberta and the yields were obtained in a season that was unusually dry. Given a season with an average rainfall, the yields would have been even greater. Mr. Noble finds sunflowers a good soiling crop, and feeds his cattle on them in July and August, besides filling his silos.

Yields similar to those obtained in Central Alberta were harvested in the various parts of Saskatchewan and Manitoba where sunflowers were grown, and it seems to have been sufficiently proved that they will grow and give enormous yields almost anywhere in Western Canada. With the whole of the three provinces becoming rapidly settled, and with the free range upon which settlers used to rely for a cheap feed, becoming scarcer and actually costing the discovery of this new fodder is of enormous importance to the farmer. Enlarged it will mean that he can increase his herd, without having to increase the size of his farm. In short, it bids fair to improve the whole agricultural situation of the prairie and bring bigger returns to the farmer.

Tests are being conducted at the Manitoba Agricultural College. At the college six cows are being used in the test, which is being made over several periods of three weeks each, with different ratios. During the

three weeks they were given sunflowers these six cows gave 402 lbs. more milk than during the previous three weeks when they were fed corn silage. They also showed a slight increase in weight.

Feeding tests show sunflowers in just as favorable a light as the harvested yields. Professor G. H. Hutten, Superintendent of Agriculture and Animal Industry of the Canadian Pacific Railway, has shown that the feeding value of sunflower silage is superior to that of corn or peas and oats mixed during the past winter. Forty Holstein cows on the company's farm at Strathmore, Alberta, were successfully fattened on corn, peas and oats, and sunflower silage for periods of two weeks, each cow being given thirty pounds of silage daily. Only the last seven days of each period were counted in the tests. The results showed that during the period when the cows were given a slightly higher percentage of butter fat, and the animals gained more in weight than during the periods with the other food.

Professor G. H. Hutten, head of the Department of Agriculture and Animal Industry of the University of Alberta, has devoted much time to the study of the sunflower as a silage crop for the Canadian farmer. The mammoth Husk is the variety that gives the most satisfaction, says Professor Culler. "This is a single stalked variety, with huge heads from twelve to fifteen inches in diameter. Under conditions even in the driest parts of the country it has been found to yield from twenty to thirty tons per acre of very good forage, per acre. The usual tonnage of corn is easily exceeded. The University of Saskatchewan has shown that sunflowers have been grown for two years, and they state that when silage is made from the crop, and that they are able to feed at the rate of thirty pounds per animal per day with good results. We have grown sunflowers here at the University for several years with success, but we did not take a yield test until this year. We have also made some of the crop for the purpose of testing its palatability. Personally, I think that there can be no question about the suitability of the crop for ensilage purposes. It contains the features of high yields, drought resistance, and is a readily adapted feeding quality."

From the foregoing, and much more that could be added to it, it seems that sunflowers are destined to become an important crop in the Canadian west. With a yield of double, and a feeding value of at least equal to that of corn, and with the fact that it will enable double the number of live stock to be supported on the same area of land, the use of silage this number can be further multiplied. With this crop generally grown, the dairy industry, which has already been established in the prairie provinces, Canada, will receive a further great impetus. And since it is claimed that sunflowers are also a valuable silage with sunflowers in the feeding of beef cattle, sheep and hogs, the growing of this crop will enable mixed farming to be carried on more successfully, thus ensuring still greater prosperity, not only among the farming community, but in the country generally.

## Work of Advisory Research Council

Activities in the Development of the Natural Resources of the Dominion.

Some very excellent work has been done during the past year by the Government Advisory Council of Scientific and Industrial Research. In the development of the Natural Resources of the Dominion and the application of the most scientific methods are of the greatest value.

Among the problems to which the country has given attention, is that arising out of the production and use of industrial alcohol. Industrial alcohol can be made from many vegetable products, and it is to the utilization of these that investigations are being conducted. The consumption of industrial alcohol in Canada in 1919 was about 125,000 gallons, while in the United States, during 1919, 400,000 gallons were consumed. It is estimated that the alcohol materials destroyed annually in the Dominion when industrial alcohol could be produced would supply from 10 to 70 million gallons.

The utilization of fish waste is also of the greatest importance in the development of the Canadian supply of fertilizer, owing to its high content of both nitrogen and phosphoric acid of two three important plant food elements, and to the fact that it has drawn a great deal of attention. The fish waste in Canada during a year is about 125,000 tons. Of this, 100,000 tons consists of proteins, which can be used in the manufacture of stock foods and fats. Investigations have to be produced such results as private capital has been attracted to the utilization, and a large company has been organized to conduct operations at Canoe, N.S., which is estimated that the full utilization of fish waste in the Dominion would result in an annual production of nearly 500,000,000 lb. of cattle food and oil.

The treatment of Canada's low grade iron deposits, which are very extensive, and its utilization, is being furthered by the council, and grants have been made for devising new methods of treatment. Results secured from experiments conducted for the purpose of producing light briquettes, which is claimed to have equal value in heating to anthracite, have been very gratifying. As a consequence, as already announced, it has been decided to erect a \$400,000 briquetting plant at Blinfield, Sask., with a capacity of 30,000 tons of briquettes a year. The conservation of the supply of helium in the Dominion is another subject which has received attention from the council. This product is secured principally from gas wells and was used in airships during the war. Large quantities may be obtained from the natural gas wells of Canada, and Professor J. McLennan, of Toronto, is conducting further investigation into its properties. The demand for helium, since the termination of the war, has been slight.

## Heir to Throne Clever Pilot

It is not generally known that the Prince of Wales pilots a private aeroplane of his own, an avro, which is garaged, rather hangared, at Croft, an aerodrome, where Prince Albert also keeps a machine. The heir to the throne is a clever pilot and very keen, but, for obvious reasons, he is not allowed to fly alone.

## Civic Cleanliness

"Bobby, what did you do with your peanut shells in the car?"  
"I put 'em in the overcoat pocket of that man I was sitting by."

## New British Type Of Wind-Motor

Permits Safe Use to be Made of the Strongest Gale.

The increasing cost of fuel in all parts of the world has drawn attention to the power possibilities of wind-mills, or "wind motors," as they are more generally described by engineers. Up to the present wind motors have been used mainly for pumping water and to a much smaller extent for generating electricity. In the latter case they have the great drawback that light winds do not drive them fast enough to produce the required voltage, while high winds drive them so fast that the generators are apt to be burned out. To obviate these difficulties a British engineer has patented what amounts to an electrical variable speed gear. His device enables the equipment to generate current at the desired voltage with any wind strong enough to turn the wind-mill and it also permits safe use to be made of the strongest gales.

The efficiency of the arrangement is therefore very high and it is enhanced by an entirely new design of wind motor. Instead of the usual rigid wings rotating round a horizontal axis, adjustable rectangles move round a vertical axis, coming up to the wind edgewise and going with it broadside on. As a convenient and economical source of electric power in districts where wind is strong, the new British invention offers an attractive prospect.

## A Permanent Wild West

A Real Wild West Resort to be Established Near High River.

Gay Weadick, the well-known cowboy stamper impresario and expert Wild West performer, has just purchased the Kuch ranch near High River, in Southern Alberta, and according to a report in the Calgary Herald is going to remodel it into a real Wild West resort. The property is an excellent one, very beautifully situated in the fork of the High River and the north fork of the High River, the land lying on the western side of both streams. This spot is only eleven miles distant from the ranch recently purchased by the Prince of Wales.

Mr. Weadick and his wife, known professionally as Grace La Due, are world celebrities as expert riders and Wild West performers. Mr. Weadick has to his credit the management of the greatest rodeo in the world, and has been undertaken, including those held at Calgary, Winnipeg and New York.

The ranch will be so equipped as to afford patrons the experience and pleasure of a bit of the real thing in the Wild West. It will provide a different kind of a holiday for those who can afford to pay the price, where they can do what they like and when they like without the formalities necessary at a fashionable resort. The enterprise is to be fashioned after and conducted in a like manner to that of another in Wyoming, which has so prospered as to yield a fine return to the proprietors.

High River will be the closest point of rail connection with this Wild West resort, and it is likely that this point will also be the place of training and assembly of animals, equipment and performers for the vaudeville acts and Wild West shows, which are from time to time presented by Mr. Weadick.

Great Britain has so far realized \$55,000,000 from the sale of surplus stores and property since the armistice.

## Transforming Face Of The Prairies By Planting Trees

About fifteen years ago a campaign of tree planting was set on foot in Western Canada, and the face of the prairie has since been gradually transformed by the introduction of millions of trees which have changed the bareness of the prairie into landscapes fair to view. The end of another quarter of a century will doubtless find this work completed, every farm with its grove of hardy trees giving welcome shade and protection. The woodlands of the east transported west. Already this planting has increased the value of many farms, and when the entire prairie has undergone the transformation in progress the value of farm lands will have gone up many millions.

The tree-planting movement has always had the encouragement of the Dominion government and the Canadian Pacific Railway, both of which distribute trees and seed free of cost to the prairie farmer. Forest trees are grown from seed at the 48-acre Government Nursery at Indian Head, Saskatchewan, and the Canadian Pacific Nursery at Wolsley. A recent telegraphic report from Indian Head states that during the past five seasons, an average of more than five million trees per year have been distributed among farmers from the government nurseries. The average number of prairie farmers receiving these annually being 4,405. Since the nurseries were established in 1901, 33,426,000 seedlings and cuttings have been distributed through the prairie provinces.

Since the culture of the trees is encouraged by the system of distribution employed by both government and railway, farmers must make them

application a year in advance, and must agree to prepare their land under direction before they receive the trees. This system has the advantage of time to time to see that the directions are being followed and that the trees are being given proper attention in the matter of cultivation.

By planting trees and laying out a shelter belt, the farmer has found what he considers an ideal combination of beauty and business. He not only transforms the prairie and beautifies his home, but, without expense to himself, he adds a considerable financial value to his farm. Aside from the purely obvious benefits derived from the general improvement of conditions, protection against wind and shelter for animals, highly interesting results have been obtained from these plantings, such as those were so barren of tree growth. Land needed to Russian Poplar cut 18-2 cords of wood for the firewood in the eighth year of its growth. It has been found, too, as belt trees grow, that the soil is enriched, and the trees are found to be a great help in the eighth year of its growth. It has been found, too, as belt trees grow, that the soil is enriched, and the trees are found to be a great help in the eighth year of its growth.

Another interesting feature of tree planting on the prairie is the protection which they afford to the young crop. It has been proved that forest growth will give fifty feet of protection to every foot in height of the trees. It has been found that in violent winds, trees fifteen feet high have protected growing crops thoroughly. As well as the shelter from the influence of the trees, the grain grew thicker until it was finally obliterating.

## Electricity From Sunlight

Day May Arrive When Electric Power Station Will Not Be Needed.

An interesting suggestion about the "Power of Tomorrow" is made by a writer in the British Nineteenth Century. He looks forward cheerfully to the day when all our electric power stations will be useless except for museum purposes. Noting that electricity is akin to light, he points out that what is necessary is to find some way of overcoming the disparity in wave-length between the two. Admitting that there are extraordinary difficulties in the way, he thinks that they may eventually be overcome and that we shall derive our electricity direct from "sunlight." When that takes place, industrial supremacy will be transferred to tropical countries. Meanwhile, Sir Charles Parsons, the famous turbine inventor, has renewed his suggestion of finding unlimited sources of power from the heat of the earth by digging a hole eighty odd miles deep. British scientific imagination is clearly in a very active condition.

## \$10,000 for a Carload of Flax

A carload of flax sold this week at Winnipeg, Manitoba, brought its owners a total of \$10,719.18. The car contained 1,921 bushels and sold at \$5.58 a bushel.

This is believed to be the highest price ever obtained in Winnipeg for a single carload of grain.

A single at nine may present a bit at ten.

## Agricultural Statistics Of Saskatchewan

The Growing Importance of the Dairy

In the year 1919 the province of Saskatchewan had 10,837,363 acres sown to wheat, according to the statement of the Bureau of Statistics, and the average yield on this area was 45 bushels, giving a total production of 489,569 bushels of this grain. A total of 4,837,747 acres was sown to oats, yielding an average of 23 1/2 bushels to the acre or a gross production of 112,156,969 bushels. The total production of barley was 8,970,501 bushels coming from 492,586 acres, with an average yield of 18 1/2 bushels. Flax which was sown on 929,945 acres produced 4,8 bushels on an average, giving a total of 4,439,761. Winter wheat is coming into greater favor with Saskatchewan farmers, was grown on 190,000 acres and yielded an average of 2,000,361 bushels from an average production of 10.5 bushels per acre. Potatoes, which were the second most important crop in the province's production, were valued at \$2,636,600 and corn, alfalfa yielded 38,400 tons.

The most outstanding feature in the province's array of figures is the growing importance of the dairy industry, butter, cheese, milk, cream and ice cream for the year being valued at no less than \$1,766,847, and poultry and poultry products at \$8,107,000. The wool clip, the greater part of which was marketed by the Department of Agriculture, realized the sum of \$580,000.

In live stock, Saskatchewan has been steadily losing ground and today leads the Dominion in the number of her horses, and is third in the number of cattle, surpassed by Ontario and Alberta only. The number of horses and cattle is 1,092,974 and sheep 1,379,583. Given number 146, 211 and swine 432,367. The total value of live stock in the province in 1919 is estimated at \$26,424,411 as compared with \$27,365 in 1918.

The amount of breaking prepared during 1919 shows a slight decrease compared with 1918, doubtless due to the dry weather experienced in the newer parts of the province, the total being 840,759 acres. Summer-fallow land increased from 1,000,000 in 1918 to 1,000,000 in 1919. Fall ploughing was accomplished on 498,724 acres.

Lord Mayor's Diamonds  
The most costly badge of office probably in the world is worn by the Lord Mayor of London. The diamonds to the value of \$600,000 and each holder of it during his term of office is called upon to enter into a bond for its safe custody before he is sworn in, and thus becomes entitled to its possession.

## Canada's Population

Estimate Shows a Total Population For All Canada of 8,835,102

The Census Department has just completed an estimate of the population of Canada, by provinces, for the year 1919. It is based on the known population increases as shown by the censuses of 1901 and 1911, and carried along in the same ratio logarithmically. While it makes no pretence to being absolutely correct, comparisons with estimates of actual figures in the past have shown that it is approximately so. The estimate shows a total population for all Canada of 8,835,102. The estimates for the different provinces are as follows:

Alberta, 587,770; British Columbia, 716,600; Manitoba, 618,900; New Brunswick, 468,760; Nova Scotia, 518,760; Ontario, 2,820,909; Prince Edward Island, 93,728; Quebec, 2,325,582; Saskatchewan, 734,090; North West Territories, 18,461; Yukon, 8,512.

"You know, old man, I was going to ask you to dinner with me tonight, but I just heard Smith remark that you were going to eat with him."

"Oh—what time do you eat?"

"Six o'clock."

"Well, that's all right, old boy. Smith doesn't eat till seven—Judge."

## Good Roads Policy

Sum of \$20,000,000 was appropriated to Carry Out Good Roads Policy

At the last regular session of the Federal Parliament the sum of \$20,000,000 was appropriated to carry out the good roads policy; the money to be spread out over a period of five years. This sum represents forty per cent. of the total outlay on extending and improving roads and highways, the balance of expenditure being borne by the various provincial governments. On a basis of population this works out as follows:

Required Federal grant provinces  
Alberta . . . \$477,810 \$2,176,715  
British Columbia . . . 1,231,985 1,877,932  
B. C. . . . 1,602,265 2,463,397  
New Brunswick . . . 1,168,845 1,745,767  
Nova Scotia . . . 1,468,270 2,031,080  
Ontario . . . 5,877,275 8,815,912  
P. E. Island . . . 603,455 905,182  
Quebec . . . 4,748,420 7,122,630  
Saskatchewan . . . 1,286,235 2,090,384

The expenditures will be made by the provinces on the basis of contract but the plans must be up to a certain standard, according to the traffic to be handled, and must be approved by the federal authorities.

## Exchange and U.S. Immigration

Exchange as an advantageous factor in encouraging American immigration seems obvious when it is pointed out that the farmer who sells in the United States and comes to Canada can get about \$115 of Canadian money for each \$100 of his American capital. Here is an instance of how it might be worked out:

An Ohio farmer sells out for \$300 per acre. With exchange at 15 per cent. This represents \$345 in Canadian money.

He goes to Western Canada and buys a farm of the same size for \$45 per acre. He still has \$300 in Canadian money for each acre.

The answer to the question as to who paid for the farm brings up only one phase of the complexities of the exchange problem involving the gold standards of the two countries.—Herald, Calgary.

## No Prescriptions

Giving his interpretation of the meaning of "Bone-dry" in a discussion which took place in the provincial legislature, on Friday of last week, Premier Stewart said:

"I take it that 'bone-dry' does not mean that the doctors can write prescriptions for liquor as medicine or anything else, so the doctors will be relieved of that if they will assist other citizens in voting on the plebiscite."

A plebiscite is to be taken some time in June to determine the question of inter-provincial traffic in liquor for Alberta.

To Be Held in the ENGELBRECHT BUILDING

on

Wednesday, April 14

at 8.00 p.m.

ADMISSION: 50c. each.

Supper served free.

among the latest arrivals. They report a good time, but a rather severe winter in the East.

Mr. and Mrs. Corlis Ellis returned recently from a winter spent in Chicago. We hope now to receive their hearty co-operation with us in our U.F.A. program.

Our school has not been opened yet for the want of a teacher but we are informed that the board has a teacher in sight and that the school will soon be in operation.

The community have added to the interest taken in social work by purchasing a organ on behalf of the community. The organ is to be placed in the school.

Mr. Wm. Ellis has been confined to the house for some time through sickness, but we hope to see him restored to his normal health soon.

To Bonnie Brier Local we would like to say that we are still in the ring and going strong. "Give us a cheer Bonnie."

Mr. M. Carmody intends taking a few days trip to the West, before seeding, we believe.

The next U.F.A. Local of Empress View will meet April 14, in the evening at G. Mills residence. The ladies are preparing a good time. Come and see.

## Inter-Varsity Boat Race

Cambridge won the annual boat race from Oxford on the Thames, England, on March 27. Cambridge won the race by four lengths in 21 minutes and 11 seconds.

## APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that H. H. Tucker, of Social Plains, Alberta, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz: Road allowance north of Sec. 8, 21, Twp. 1, W. 4th. Road allowance west of Sec. 8, Twp. 21, R. 1, W. 4th. Any protest against the granting of the above-mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

H. H. TUCKER, Applicant, Social Plains, Alberta, March 31, 1920.

## BUTTERFAT Values Higher

Cream producers will be glad to know that prices have advanced sharply recently. You will find it very profitable to ship cream this season. We will be pleased to supply prices and full information on shipping cream, and solicit your patronage.

The "Much-Better" Store for Service JOHN I. STOUTD

## Vandyne Local

Vandyne U. F. A. held a large meeting on March 20. Mr. Harris and Mr. and Mrs. Hallman gave the addresses on U. F. A. and U. F. W. A. work which were greatly appreciated by all. Supper was served after which a hearty vote of thanks was given the speakers. Dinning then took place until morning.

The W. I. met with Mrs. Chas. Dahl, April 1. Mrs. Grogg gave a splendid report of the Convention. Nineteen members and one visitor were present. The W. I. meets with Mrs. W. Dolling, May 6.

John Young was a Bindless and Express caller on Monday March 22.

Luke McCauley has returned

from Sovereign, Sask. where he has been visiting relatives and friends.

Mrs. Pearl Blood who has been at Mrs. P. Grogg's is now back home again.

Mr. and Mrs. Dahl called at Mr. and Mrs. Cairns, on March 22. J. Young and family, and Miss Craudfemire, were Mr. and Mrs. M. P. Gordon's visitors on Sunday, March 21.

A special U. F. A. meeting was held at the home of Chas. Dahl on Saturday, March 20. After the business was over music, singing and card playing took place for the remainder of the evening.

H. Hanson visited the F. Snyder home on Sunday.

Mr. and Mrs. Oting and son Henry, Mr. and Mrs. H. E. Cain, and Mr. and Mrs. Ed. Krogman were Mr. and Mrs. C. F. Dahl's

visitors on Sunday March 21. S. Hanson has returned from Eugene, Oregon, where he spent the winter months. Sig says, "Oregon is a nice place, although he can't stay away from Vandyne."

Leo St. Pierre and family who left our vicinity in the fall, returned last week.

H. E. Cain's sale was a success. Mr. Cain expects to leave our district soon.

Mrs. W. Blood, Mrs. J. Blood, Mrs. C. Holden, Mrs. Young and Mrs. Ed. Krogman called at the home of Mrs. Cain on Thursday, March 25.

Emil Loranson who has been at Carleton Place, for the past four months returned Monday, March 22.

Mrs. M. F. Gordon called at Mrs. Chas. Dahl's on Thursday, March 25.

## Income Tax Return

on or before the 30th of April, 1920.

Department of Finance

**ALL persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:—**

1. Every unmarried person, or widow, or widower, without dependants as defined by the Act, who during the calendar year 1919 received or earned \$1,000 or more.
2. All other individuals who during the calendar year 1919 received or earned \$2,000 or more.
3. Every corporation and joint stock company whose profits exceeded \$2,000 during the fiscal year ended in 1919.

Forms to be used in filing returns on or before the 30th of April, 1920.

\* **ALL INDIVIDUALS** other than farmers and ranchers must use Form T 1.

**FARMERS AND RANCHERS** must use Form T 1A.

**CORPORATIONS** and joint stock companies must use Form T 2.

### Penalty

Every person required to make a return, who fails to do so within the time limit, shall be subject to a penalty of Twenty-five per centum of the amount of the tax payable.  
Any person, whether taxable or otherwise, who fails to make a return or provide information duly required according to the provision of the Act, shall be liable on summary conviction to a penalty of \$100 for each day during which the default continues. Also any person making a false statement in any return or in any information required by the Minister, shall be liable, on summary conviction, to a penalty not exceeding \$100,000, or to six months imprisonment or to both such fine and imprisonment.

### General Instructions.

Obtain Forms from the Inspectors or Assistant Inspectors of Taxation or from Postmasters.

Read carefully all instructions on Form before filling it in.

Prepay postage on letters and documents forwarded by mail to Inspectors of Taxation.

Make your returns promptly and avoid penalties.

Address **INSPECTOR OF TAXATION, CALGARY, ALTA.**

**R. W. BREADNER,**  
Commissioner of Taxation.

### OH, BOY!

Man is to resemble a cross between a wild bouquet and a tightly tied bundle of spinach before next autumn if early showing of spring clothes are to be taken seriously. And salesmen and price tags convince one they are.  
Suits are skin tight, the salesman explained, as he reverently showed a coat that didn't appear quite unfolded. Seams almost crowd each other to save expense; or cloth or something other than the feelings of any except a slender athlete.

reinforcement called a belt. It is less than a half belt that loses both ends in pants.

Gaily stripes still mark the spring silk shirts.

As for ties, they speak for themselves.

The man milliner has become an economist. Felt hats are of extremely narrow brim, except the French and Italian imported creations. Two American hats could be made from an Italian headpiece.

Of course if you don't like to wear this stuff, the dealers have a few suits left over from 1903.

## You'll Never Make a Dollar Easier Than This!

**Big Clubbing Offer**

By special arrangement, we are prepared to offer a combination subscription to this paper and The Nor-West Farmer at a bargain price. If you are now a subscriber, you will be prepared to renew for another year. If you are not a subscriber, your certain ought to be.

### The Old Reliable Farm Paper

A good farm paper such as this actually contains hundreds of practical ideas and other valuable information of real benefit to any up-to-date farmer. Here then this The Nor-West Farmer has taken a step in service by establishing its popular "Advertiser's Service Bureau," through which subscribers and their families are freely supplied with reliable and accurate information on every matter of interest to the farmer. The service is free of charge. In any way, and copies of important problems are dealt with by the large staff of expert veterinarians, lawyers, and other farmers. Your money will be refunded and others trained to handle difficult farming problems at every day. This service and assistance is free to you as a subscriber to the Nor-West Farmer. You will never regret taking advantage of the offer.

## Grain Prices

AT EMPRESS, Thursday, April 8

Wheat No 1, Nor. 1.92	No. 2, 1.89	No. 3, 1.85
Flax 4.90	Oats .86	
Barley 1.32	Rye 1.70	

D. McEchern has purchased  
the Scott Brown residence.

Mr. and Mrs. L. H. Shannon  
arrived from the States on  
Monday.

Miss Della Trail, left for  
Swallow, Alberta, on Thursday  
of last week.

If you are interested in  
money-saving values in groceries  
Brodie's advt. will interest  
you.

Mr. C. W. Ahern, of Atlee,  
made a business trip to Empress  
this week.

Mrs. W. Hughes, received  
word this week of the death of  
her sister Miss Annie Brownlee  
at Clough, Co. Antrim, Ireland.

Mr. F. G. M. Cole, announces  
that he has sold his famous pony  
"Shorty," to Scott Brown. We  
understand Scott is to use this  
animal for saddle purposes.

A large number attended the  
Special evening service at the  
Union Church on Sunday last.  
The musical part of the service  
and the address were much en-  
joyed.

Misses Gladys and Bernice  
Stewart, Eva Dawdy and Lucile  
Lambert were visitors to Lander  
on Monday of last week, the  
three former taking part in the  
recital given by Miss Schori's  
pupils. Mrs. Stewart accom-  
panied the girls on their jour-  
ney. The recital is reported to  
have been a good success.

"Chautauqua" dates are an-  
nounced as from May 24 to 29  
inclusive.

For rent—four-room cottage,  
2nd Avenue West. Inquire of  
M. A. Bridgett.

Do not fail to take advantage  
of these grocery prices. Brodie  
says they are real "go-getters."

"Bill" Ellis is reported to have  
been brought in from the  
country suffering with pleurisy.

Mrs. S. E. Peters, is visiting  
with her daughter, Mrs. Geo.  
Milton, at Swallow, Alberta.

Mr. and Mrs. W. S. Stocks,  
who have been spending the  
winter at Atwood, Ont., return-  
ed on Monday.

Milton Hicks was the lucky  
winner of the box of chocolates  
from the Princess Confection-  
ery. The winning number was  
470.

Charlie Young, who has been  
staying on a ranch in the Me-  
dicine Hat district for several  
months, returned on Monday.

J. C. Sodina, of the Imperial  
Hotel, at Swift Current, was a  
visitor to town on Wednesday,  
in connection with his business  
investments here.

This year winter is very loath  
to leave us, and good ice suitable  
for curling purposes seems a  
little out of season at this time  
of the year, but is neverthe-  
less true. Some of the local curlers  
were busy on Good Friday; only  
one ice was in use.
